## ABSTRACT

The abstract must be single spaced and no more than 350 words. The abstract must contain the following elements: (1) statement of the problem, (2) procedure or methods, (3) results, and (4) conclusions. Mathematical formulas, abbreviations, diagrams, and other illustrative materials should not be included. It should be written to be understood by a person who does not have expertise in the field.

## INTRODUCTION

Welcome to the Montana State University electronic Thesis/Dissertation (ETD) L<sup>A</sup>T<sub>E</sub>X template. In this chapter various sections, subsections, and subsubsections are created and filled with random text). In Ch. ?? methods to write equations and how to include figures and tables are explored. Conclusions are drawn in Ch. 2.

### Section

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Vestibulum pellentesque felis eu massa.

Subsection With a Very Very Very Very  
Very Very Very Very Very Very Long Title

For long subsection titles use the command `\longsubsection{#1}{#2}`, where `#1` is the first line of the long title, and `#2` is the second line of the long title. You can also pass an optional argument to this command that puts a shorter title in the table of contents as shown by the subsection below.

Subsection With a Very Long Title  
But Shortened in the Table Of Contents

There are **not** similar commands for sections and subsections as these are not specified in the MSU style guide.

## CONCLUSION

$\text{\LaTeX}$  produces documents that look great, automatically handles references and citations, and easily incorporates figures and tables. This is not a guide to  $\text{\LaTeX}$  but rather an introduction to the MSU style. If you want more information about  $\text{\LaTeX}$  many introductory guides can be found online.
